About Me

I am a recent Software Engineering graduate seeking a full-time job opportunity or a training program that leads to employment. I have a solid understanding of full-stack web development using .NET and Angular, along with a general knowledge of various software engineering domains. I am eager to apply my academic background to real-world projects and further develop my technical and professional skills through a role at your esteemed company.

Education

Bachelor's Degree in Software Engineering   **Oct 2021 - Jan 2025**

Hashemite University, Jordan

GPA: 3.75

Skills

Frontend Development : HTML, CSS, Bootstrap, TypeScript, Angular

Backend Development : C#, ASP.NET Core MVC, ASP.NET Core Web API, LINQ, Entity Framework Core, SQL Server

Software Engineering Principles : Object-Oriented Programming (OOP), SOLID Principles

Tools & Platforms: Visual Studio, VS Code, Git, GitHub, Postman, PowerPoint

Soft Skills: Teamwork, Communication, Time Management, Presentation Skills, Adaptability, Fast Learning

Experience

Web Development Intern   **Jul 2024 – Aug 2024**
KabsetZr – Amman, Jordan
- Designed and developed client websites using SP Page Builder Pro
- Created customized layouts and enhanced UI/UX
- Contributed to front-end implementation and client-focused design

Full Stack Development Trainee   **Apr 2025 – Present**
Supervised by a Senior Engineer – Remote
- Learned C#, LINQ, EF Core, SQL Server
- Learned HTML, CSS, Bootstrap, TypeScript, Angular
- Built APIs using ASP.NET Core Web API
- Worked on frontend projects and developed a portfolio website
- Completed a full-stack project integrating frontend and backend

Projects

Exam Scheduling System (Graduation Project)
Web-based scheduling system that allows users to manage exam slots, dates, and locations.
Technologies: ASP.NET Core MVC, EF, SQL Server, LINQ

GitHub : [Exam Scheduling System](#)

Personal Portfolio Website
Modern and responsive portfolio site featuring dark/light mode, animated sections.

Technologies: HTML, CSS, TypeScript, Bootstrap, AOS

GitHub : [Portfolio Website](#)

Employee Management & Vacation Workflow System
Backend-first RESTful API built with ASP.NET Core and Entity Framework Core using Code-First approach. Includes CRUD operations, data seeding, LINQ queries, and vacation request workflows.
Technologies: ASP.NET Core Web API, Entity Framework Core, SQL Server

GitHub : [Employee Management and Vacation System](#)

EnviroSeek
Static website built for the One Million Jordanian Coders Challenge, promoting environmental awareness and sustainability.
Technologies: HTML, CSS, Figma

Languages

Arabic — Native

English — Professional Working Proficiency
